

Indoor Garden Add-On Kit (KINA1) Assembly Instructions

Congratulations on purchasing one of DripWorks' kits, the easiest way to get a complete drip irrigation system setup to fit your gardening needs. The kit has two parts; the faucet assembly or system start portion that brings the water to your garden and emitters that distribute that water to your plantings.

This add-on kit was designed to double the coverage of the Indoor Garden Kit (KIN1).

System Start

This portion of the kit includes the 8-way manifold (RMAN8), hose shutoff (HSO), a 50' roll of 1/4" vinyl tubing, and a hose thread by 1/2" male pipe thread elbow adapter (HFAA9012).

1. Remove the cap from the filter/regulator (FPR17) unit's second outlet
2. Thread hose thread end of the elbow adapter (HFAA9012) onto the outlet
3. Wrap the male pipe threads of the elbow adapter with thread sealant tape
4. Thread the 8-way manifold onto the elbow adapter

Emitting Devices

The Indoor Garden Add-On Kit includes $\frac{1}{4}$ " Soaker Dripline, with built-in emitters spaced every 12", and a roll of blank $\frac{1}{4}$ " vinyl tubing. In addition, the kit includes $\frac{1}{4}$ " transfer barbs, $\frac{1}{4}$ " goof plugs, $\frac{1}{4}$ " tees, and hold down stakes.

1. To create a ring in a container
 - a. Cut the $\frac{1}{4}$ " Soaker Dripline to the desired length and create a circle
 - b. Use the $\frac{1}{4}$ " tee to join the two ends of the $\frac{1}{4}$ " Soaker Dripline together
2. Connect the ring to the $\frac{1}{4}$ " vinyl tubing with the remaining tee outlet
3. Run $\frac{1}{4}$ " vinyl tubing back to the 8-Way Manifold and cut it to the desired length
4. Unscrew an outlet cap on the 8-Way Manifold outlet and connect the tubing
5. Repeat for all desired setups
6. Connect the hose shutoff end to the inlet of the sled base
7. Connect the male end of your garden hose to the hose shutoff
8. Turn on the water and test the system
