

# The Mazzei 3/4" Low Flow Fertilizer Injector with Bypass and Suction Assembly (IM34L/IM34BP/IM34SA)

\* Sold Separately

\*Components are dependent on available flow and pressure. Check individual specifications.

This illustration shows the Mazzei venturi style injector and suction assembly installed on a bypass to provide control of the injection rate. Further control may be gained by installing gauges at either end of the bypass to determine the pressure differential between the inlet and outlet and 'dial in' the optimal setting for greater efficiency.
